**Until now, smaller organisations could only gaze at enterprise-class learning management systems with longing. Big features, sure – but out of your reach.**

Now everything's changed. With CourseMill for IBM WebSphere Portal, you get big features without the big price ticket.

CourseMill for Websphere Portal is recognised as a business partner solution aligned to the Portal NOW! programme. Available with a rapid implementation package, CourseMill is the ideal e-learning solution to adopt alongside the IBM Portal NOW! solution templates.

There's one company that can help you to put the whole thing together – not just assembling the technologies, but also creating a robust, cost-effective e-learning strategy. That company is Transition – a company that not only has a long history of partnership with IBM, but one that has also won international e-learning awards in its own right.

#### **Transition can help with:**

- Migrating your current investment in e-learning content from IBM LMS 1.x and WCL 2.x to CourseMill for IBM WebSphere Portal
- Installation and configuration: tune the LMS to your needs
- Portal integration: connect your LMS with other systems
- Customisation: your LMS, your way
- Development of custom content: everything from short tutorials to large-scale e-learning programmes

#### **CourseMill**

- Powerful learning management system from Trivantis, the creators of Lectora
- Easy installation, easy customisation
- SCORM conformant
- Available in multiple languages immediately and simple to translate into other languages

#### **CourseMill for IBM WebSphere Portal**

- Specifically designed for the small and medium enterprise
- Based on proven IBM WebSphere and IBM DB2 technologies
- Compatible with the same authoring environment used for IBM Learning Accelerator – Saba, enabling organisations to migrate up to the full Learning Accelerator offering as they grow

IBM WebSphere Portal NOW Enabled
